

450AJSII Articulating Boom Lift

APPLICATIONS

- Facilities maintenance
- Electricians
- Plumbers
- All maintenance and construction work
- Factory fit outs before electrical power is connected

Proportional controller for lift and lower and boom swing give smooth control

One handed operation for operator comfort and control. Proportional drive controller gives smooth control

Jib boom and basket rotate allows additional functionality and access to hard to reach positions

Articulated boom function provides increased outreach at height and allows fast operation from ground to full height using upper boom lift and main boom, telescope and jib

Load Sensing System

Low maintenance steel platform with non-skid mesh floor, and side entry gate. Enclosed foot switch

Cylinder boots protect cylinder shafts from debris and contaminants

Perkins 4 cylinder water cooled diesel engine and transmission pump to match drive and function power and performance requirements with a quieter engine and lower operating cost

Tie down and lifting lugs for ease of transport

4 wheel drive with hydraulic piston 2 speed motors, gear reduction hubs and spring applied brakes for 4 wheel drive traction, provides maximum traction and ease of steering

Front axle oscillates when travelling with counterweight over steer tyres, assists in accessing difficult sites

Urethane filled, puncture proof lug tyres
